Platforms

Boeing Academy at Home Website
All participant activity will be hosted from our Boeing Academy for STEM Learning at Home website: boeingacademy.museumofflight.org. This platform is a web-based “classroom” which will require participants to login each day. You will receive an email from that contains a link to this website along with your participant’s username and password and you will be prompted to create a new password. If you forget your password, you should be able to reset it on the website or you can contact Education@museumofflight.org for help. There is a phone app available as well, but we don’t recommend using it due to issues with functionality.

GoToMeeting / GoToTraining
All of our live interactions and presentations will occur with this online platform that will allow participants to share their own audio/video and type comments into a text box. This can be accessed via phone as well. These sessions will be recorded in case a participant has technical issues that prevent them from participating, but we encourage all participants to participate in them live. Links to scheduled sessions will be shared with your participant via the Boeing Academy website and in email. We want to remind participants to only use their first name when logging into these sessions! There is a GoToMeeting app that is available as well.

YouTube
Demonstration videos and recorded content will be made available to participants via our private YouTube channel. These links will also be shared via our Moodle website and in email. We ask that participants and families do not share these links with others.

Software Requirements
We recommend using Google Chrome as your web browser for all courses. For some courses, Google Chrome is required.
